

Ryan Rupp

I am currently a junior and a marketing major but plan on changing to finance. I am not too sure what career I am looking for after college, but a dream goal would be private equity.

I would say that I am above average for my technical skills. I have had a computer my whole life and know all the basic formats such as Microsoft word, adobe, google doc, and even some photoshop as I took these in my everyday life such as school, work, and my position in my fraternity.

My current Jobs

I am from El Dorado Hills California, which is right outside of Sacramento. I came to UNR because it was close to home but just far enough to feel like I moved away. Some of my hobbies include the gym, fishing, and hanging out with my friends. I also work a lot and I enjoy working most of the time. A fun fact is I have a fish tank with 13 fish in it. I am weirdly nerdy about my fish tank. My favorite movie would have to be between Good Will Hunting, Ratatouille, and Talladega Nights. My biggest dream is to own my own business and my own restaurant
